

## LAKO-2 LAMP TESTER

The LAKO-2 Lamp Tester provides a quick, simple and convenient method of testing the operational condition of a twin filament lamp or two single filament lamps in a duplex arrangement.

### FEATURES

This small unit exhibits two LED's (light emitting diodes) which are illuminated by a push-button to indicate the lamp filament status.

The tester can be mounted at the foot of the beacon structure or on the trestle of a buoy and avoids the need to open the lantern unnecessarily.

Connected to flasher via lightweight three-core cable.

*LAKO-2 Lamp Tester*

<b>Input Voltage:</b>	12 volt DC nominal	<b>Dimensions:</b>	73 x 50 x 110mm (Dia x H x L)
<b>Operating Temperature:</b>	-20°C to +60°C	<b>Weight:</b>	160g
