

Single Lift Assembly - Solar Powered Class C Zone

The Automatic Power Class "C" single lift assembly Aids to Navigation package is a rugged compact unit designed for applications requiring a single lantern without a fog signal. It meets or exceeds U.S. Coast Guard requirements for Class "C" Aids to Navigation as specified in 33CFR sub-part 67. This galvanized self contained unit contains a solar power system with battery and battery box. The solar array can be positioned in the field to assure it faces due south.
